SUMMARY

Motivated and detail-oriented Frontend Developer with a passion for creating modern, responsive, and user-centric interfaces. Skilled in HTML, CSS, JavaScript, and EJS, and currently learning React to enhance component-based development and improve user experiences. I focus on writing clean, maintainable code and building intuitive interfaces.

In addition, I have hands-on backend experience with Node.js, Express, and PostgreSQL, including building RESTful APIs, integrating databases, and performing CRUD operations. I am continuously expanding my full-stack skills to develop efficient and scalable applications.

EDUCATION

Bachelor's Degree in Computer Engineering

Azerbaijan Technical University

📅 09/2020 - 06/2024

Master of Business Administration (MBA)

Azerbaijan Technical University

📅 09/2024 - Present

SKILLS

Frontend Development

| HTML | CSS | JavaScript | React | Responsive Design | EJS | UI/UX Fundamentals |

Backend Development

| Node.js | Express | PostgreSQL | REST APIs | CRUD operations |

Tools & Other

| Git | GitHub | npm | Electron (basic) | Postman |

Soft Skills

| Problem-solving | Effective Communication | Fast Learning | Responsibility | Attention to Detail | Adaptability |

| Teamwork |

PREVIOUS PROJECTS

Freelance Portfolio & Information Websites (Remote, 2023)

📅 2023

- Built several small-scale websites for clients, including personal portfolios and information/business pages.
- Designed responsive layouts and improved mobile usability.
- Communicated with clients remotely to gather requirements and deliver functional, clean UIs.
- Focused on visually simple but effective designs.

Work-Space Productivity App

📅 2025

GitHub: ibrahimmdef/work-space

- Developed a personal productivity application focusing on the Pomodoro technique, task management, and activity tracking.
- Built features such as custom focus timers, task creation and completion, and activity monitoring.
- Implemented a clean UI using HTML CSS and structured JavaScript logic.
- Designed the app to help users improve workflow and time management.

Full-Stack Book Library Application

📅 2025

GitHub: https://github.com/ibrahimmdef/book-library

- Created a full-stack book management system with login, session handling, and user authentication.
- Built RESTful APIs and implemented CRUD operations for storing books, quotes, and user data.
- Integrated EJS with Express for dynamic content rendering.
- Added secure password hashing using bcrypt and cookie-based session persistence.

Highlights

CURRENT PROJECT

Simple ERP & POS System (Ongoing Project)

📅 2025 - Present   📍 Location

Node.js, Express, PostgreSQL, HTML, CSS, JavaScript ElectronJS

- Currently developing a lightweight ERP and POS solution for small businesses.
- Includes product management, sales processing, and basic resource/stock tracking.
- Building backend APIs, database schemas, and a modular frontend interface.
- Exploring deployment options such as local network access and Electron for desktop packaging.

KEY ACHIEVEMENTS

Frontend:

- Currently designing a **lightweight ERP & POS system**, including sales processing, product management, and resource tracking.

- Strong foundation in **frontend and backend development**, including React, Node.js, Express, PostgreSQL, and UI/UX best practices.

- Practiced **clean code principles** and **component-based development** in all personal and freelance projects.

Backend:

- Created **Full-Stack Book Library Application** with user authentication, session management, and CRUD operations using **Node.js, Express, PostgreSQL**.

- Currently developing a **lightweight ERP & POS system** including sales processing, product management, and basic resource tracking.

- Practiced building **REST APIs**, database integration, and secure login systems across personal projects.
